E-commerce site 🔗 The project uses React Router, Context and TailwindCSS
JS dice rolling game 🔗 JS Educational Purposes

SKILLS

- Ability to work under pressure
- Fast Leaner
- Teamwork
- Communication

COVER LETTER

Dear,

I have completed high school at the Rade Koncar School of Electrical Engineering in Belgrade, specializing in computer engineering. Additionally, I attended the IT Academy after high school, focusing on Frontend JavaScript Web Development. I am currently enhancing my skills through courses on the Udemy platform, currently taking a React course.

I am 21 years old and deeply committed to the field of IT, particularly in frontend development. I am genuinely ambitious. I am in search of an unpaid internship to expand my experience and pursue my ambitions in the IT industry. I am willing to sacrifice my current job to fully dedicate myself and focus on learning, believing that I can be of assistance. Thank you in advance.

Best Regards,
Milan Pavlovic
