About Me

Hi, I'm Milan, 23 years old. I enjoy working with web technologies and I'm currently focused on front-end development, but I'm also aiming to grow into a fullstack role over time.

Education

- **Rade Končar School of Electrical Engineering – Computer Technician**
- **IT Academy - Frontend JavaScript department**

Profesional Experience

- **Courier -** BC Group
- **Bartender -** Sunset 1999 | Ada Ciganlija
- **Operator At the Payment Point** - Balkan Bet
- **Frontend Developer internship -** Hono Media

During my seven months at the company, I had the opportunity to work on real-world projects and significantly expand my skills and knowledge. Although my main focus was on frontend development, I also stepped into the backend world—working on CRUD functionalities, which helped me better understand how frontend and backend interact.

I got hands-on experience with the Next.js framework and various useful packages that streamline and speed up development. Among other things, I worked on building a simple real-time chat application and developing scrapers for automated data collection. Through these tasks, I learned how to better structure code, optimize performance, and solve problems more efficiently in day-to-day work.

In addition to technical skills, I gained valuable experience in teamwork, communication with colleagues, and navigating larger projects with real users and deadlines.

Languages

- **English -** Proficiency English | B2
- **Serbian -** Native
